

DEFECT REPORT

- 1. Report Number:** 07
- 2. Source of report:** Barbara Shuh, National Library of Canada
- 3. Report Submitted to:** Interlibrary Loan Application Standards Maintenance Agency: 30 April 1998
- 4. Report Concerning:** ISO 10161-1:1997(E)
- 5. Type of Defect:** Clerical
- 6. References in Document:** Table A.4

7. Nature of Defect: In this edition of the protocol specification, the incoming event "CAR-repeat" precedes the incoming event "CAR-". This appears to be a clerical error made during the final editing process by the ISO Secretariat. This version disagrees with the order of events in Table A.4 in the 1st edition of the standard (ISO 10161:1993) and the order in the final draft version as reviewed by the editors of the standard at the National Library of Canada.

There also is a minor error in the capitalization of "Carind-".

	IDLE	PENDING	NOT-SUPPLIED	CONDITIONAL	CANCEL-PENDING	CANCELLED	SHIPPED
...							
CAR - repeat		CARind - PENDING					Carind - SHIPPED
CAR -		CARind - PENDING			CARind - PENDING		CARind - SHIPPED

8. Solution Proposed by the Source: Revise the table by reversing the order of the table rows for these two incoming events, and correct the capitalization of the abbreviated name for the outgoing event in the cell formed by the intersection of CAR-repeat and SHIPPED to read: "CARind-".

	IDLE	PENDING	NOT-SUPPLIED	CONDITIONAL	CANCEL-PENDING	CANCELLED	SHIPPED
...							
CAR -		CARind - PENDING			CARind - PENDING		CARind - SHIPPED
CAR - repeat		CARind - PENDING					CARind - SHIPPED

9. Secretariat's Response: Not required
