ISO/TC 46/SC 9 N 309 to N 322

2002-06-30

To: Members of ISO/TC 46/SC 9
cc. ISO Central Secretariat

SUBJECT: Summary of the 2001 systematic review of standards developed by ISO/TC46/SC9

Dear Colleagues,

The attached tables (SC9 documents N 309-322) show the results of the 2001 systematic review of 14 standards developed by ISO/TC 46/SC 9.

A clear majority of the voting P-members were in favour of confirming each of the reviewed standards. Accordingly the ISO TC46/SC9 Secretariat recommended that these 14 standards be confirmed for another five year period.

The 2001 review results indicated that there is some interest in revising the two ISO standards on thesauri (ISO 2788 and ISO 5964). Any P-member of TC46/SC9 is invited to submit a proposal for revising ISO 2788 and/or ISO 5964, providing that the proposal is accompanied by an offer of project leadership and a first working draft or outline for the revised standard(s).

Please note that many of the standards (in the area of document presentation) that were reviewed in 2001 are no longer included in SC9's programme of work, as a result of restructuring TC 46 last year.

It should also be noted that several P-members (11 out of 23) either did not respond to the 2001 review or abstained from voting. This is a disappointing result because the systematic review is the only available way to gauge the effectiveness and implementation of ISO TC 46/SC 9 standards throughout our member countries. Given the poor response rate, the 2001 systematic review results are not as meaningful as they should have been.

ACTION REQUIRED:

- **Retain this document for reference in future systematic reviews**
- **P-members are reminded of their obligation to vote in future systematic reviews.**

With regards,

[original signed by]

Jane Thacker
Secretary, ISO/TC 46/SC 9

Comments:

DS (Denmark): A revision is proposed to precise the area of validity.

AENOR (Spain): UNE 50110:1990 equivalent to ISO 18:1981. No technical changes.

In the light of the above results, this International Standard

should be confirmed.

NOTE - As of October 2001, this standard was removed from the SC 9 programme of work and placed under the direct responsibility of TC 46 as a completed area of work.

ISO 18 remains valid for the print environment in which it was developed and will be subject to its next systematic review at the TC level in 2006.

will be revised

Comments:

DS (Denmark): A revision is proposed to precise the area of validity.

PKN (Poland): The abstract sheets were intended as substitutes for documentation cards. Documentation cards are no longer made. Therefore the usability of the standard is dubious.

AENOR (Spain): UNE 50112:1992 equivalent to ISO 5122:1979. No technical changes.

In the light of the above results, this International Standard

should be confirmed

NOTE - As of October 2001, this standard was removed from the SC 9 programme of work and placed under the direct responsibility of TC 46 as a completed area of work.

ISO 5122 remains valid for the print environment in which it was developed and will be subject to its next systematic review at the TC level in 2006.

will be revised

Comments:

DS (Denmark): A revision is proposed to include new types of material as well as other issues.

UNI (Italy): The Revision should take into account the electronic documents indexing, the computer-aided indexing and the outline systems.

AENOR (Spain): UNE 50121 equivalent to ISO 5963:1985. No technical changes.

SIS (Sweden): Swedish number: SS-ISO 5963.

BSI (U.K.): U.K. sales of BS 6529 and ISO 5963 in 2000: £366.

In the light of the above results, this International Standard

should be confirmed

will be revised

Tentative target date for submission: as a DIS:

as a FDIS: for publication:

should be proposed for withdrawal (y/x < 9)

Comments:

CSNI (Czech Republic): CSN ISO 5963, published March 1996.

DIN (Germany): The standard does not represent today's state of the art anymore. When the standard was published at the international level there were dissenting comments on it not all of which were taken into consideration.

UNI (Italy): The Revision should take into account the online systems; the computer applications and the electronic documents indexing.

AENOR (Spain): UNE 50125:1997 equivalent to ISO 5964:1985. No technical changes.

SIS (Sweden): Revision in order to combine ISO 2788 and ISO 5964 into one standard.

BSI (U.K.): Revision of ISO 5964 and ISO 2788 should go hand in hand and result in a combination, as parts 1 and 2. Additional information: United Kingdom sales of BS 6723 and ISO 5964 in 2000: £ nil.

In the light of the above results, this International Standard

should be confirmed.

NOTE – P-members are invited to submit a separate proposal to revise both ISO 2788 and ISO 5964 for SC 9 approval on condition that a first working draft and offer of project leadership accompany the proposal.

will be revised

Comments:

PKN (Poland): Corresponding Polish standard PN-78/N-01222.08 (equivalent but more general). There are no recommendations concerning: the name of the publisher; the title of the series; library identification field.

AENOR (Spain): UNE 50120:1992 equivalent to ISO 6357:1985. No technical changes.

In the light of the above results, this International Standard

should be confirmed

NOTE - As of October 2001, this standard was removed from the SC 9 programme of work and placed under the direct responsibility of TC 46 as a completed area of work.

ISO 6357 remains valid for the print environment in which it was developed and will be subject to its next systematic review at the TC level in 2006.

will be revised

Comments:

PKN (Poland): The reasons for revision: The revision of this standard should take into account the fact that nowadays dissertations are prepared as electronic manuscripts. Therefore all the clauses that are connected with the printed form of publication i.e. the clauses that specify the forms of reproduction, the quality of paper, the parts of publications, have to be deleted. The data elements which are necessary to identify the dissertation must be defined. Therefore, instead of saying that the front matter shall consist of outside and front cover, title leaf... it must be said that front matter shall consist of the authorship data (names of author(s), names of the reviewers, name of the adviser, name of the institution to which the thesis is submitted), title data (title and subtitle), publisher's front matter (place of publication, name of publisher, date of publication, copyright notice, ISBN), preface, table of contents, abstract. The clause 5.5 should be reworded in the same way. It must be said that the end matter shall consist of indexes, curriculum vitae, glossary, list of bibliographic references.

AENOR (Spain): UNE 50136:1997 equivalent to ISO 7144:1986. No technical changes.

SIS (Sweden): In SS-ISO 7144 is Annex A and B of ISO 7144 deleted. Instead reference is given to SS 038207 (which is the Swedish translation of ISO 690).

In the light of the above results, this International Standard

should be confirmed.

NOTE - As of October 2001, this standard was removed from the SC 9 programme of work and placed under the direct responsibility of TC 46 as a completed area of work.

ISO 7144 remains valid for the print environment in which it was developed and will be subject to its next systematic review at the TC level in 2006.

Comments:

SCC (Canada): ISO 7220 appears to be obsolete because of the development of Web databases of standards.

PKN (Poland): Clause 6.5, 2nd paragraph: In the second sentence there should be clearly stated, that the ISO International Classification of Standards shall be used.

In the light of the above results, this International Standard

should be confirmed

NOTE - As of October 2001, this standard was removed from the SC 9 programme of work and placed under the direct responsibility of TC 46 as a completed area of work.

ISO 7220 remains valid for the print environment in which it was developed and will be subject to its next systematic review at the TC level in 2006.
