Activity 7

Comparing Settlement Groups

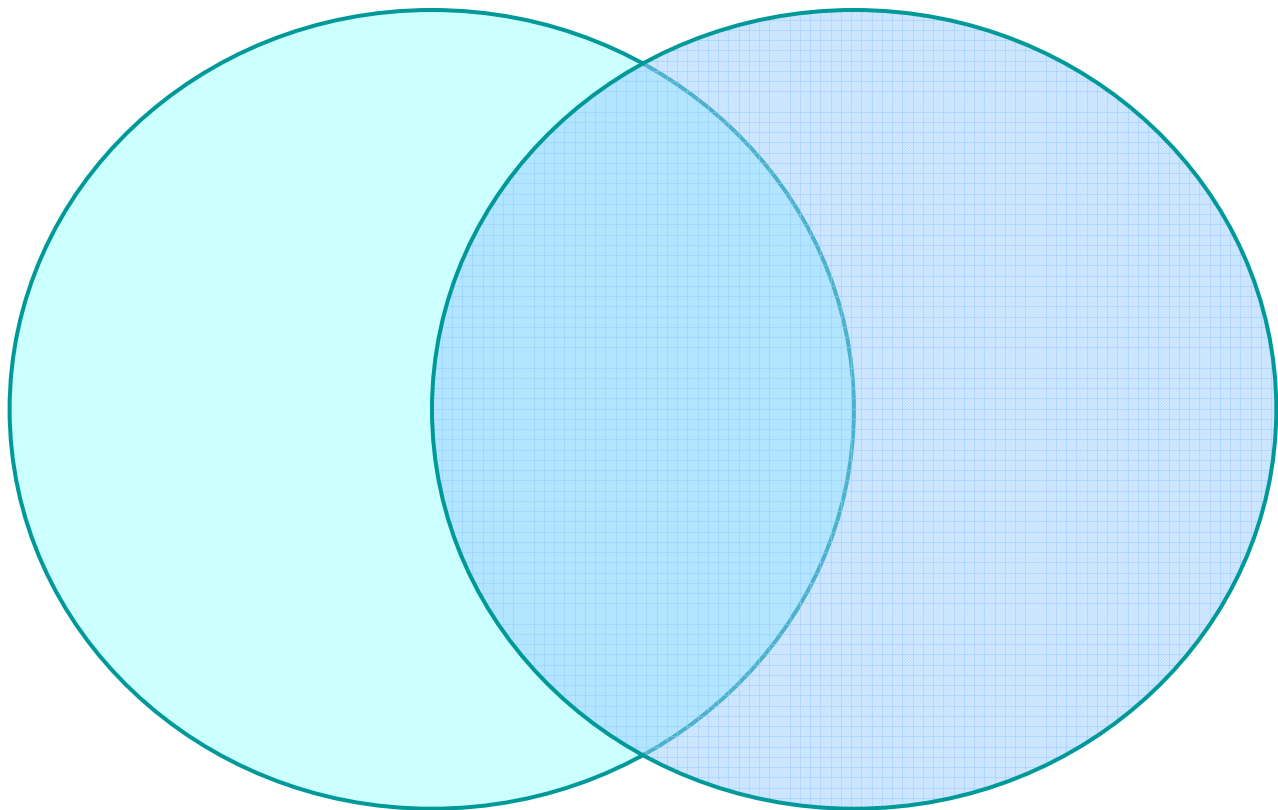

Name: _____ Date: _____

A Venn diagram is a circle graph that can be used to show the similarities and differences between two different groups. Use the data you have collected to compare two of the settlement groups. Label the circles so everyone will know which circle belongs to which settlement group. Write the facts about the groups that are the same in the part of the two circles that overlap. Write the facts about the groups that are different in the parts of the circles that don't overlap.

Needs Improvement

In the box at the end of each line draw the face that best describes your work on this activity.

I/We can explain the use of a Venn diagram to another person.	
I/We labeled the Venn diagram neatly and correctly.	
I/We used the overlapping parts of the circles in the Venn diagram to record the similar elements of two settlement groups.	
I/We used the non-overlapping of the circles in the Venn diagram to record the parts of the appropriate group that only describes that group.
