**44 Cast Aluminum Tea Kettle** with swing away lid. Capacity is about 10 pints. Black plastic handle and knob. Diameter at base is 10 inches. 0153-1218. Price, delivered..... **10.65**

## COMBINATION COOKER

**45** This Aluminum Combination Cooker can be used as a preserving kettle, a steamer, a small covered roaster, a combination cooker, a cullender, open pudding pan, double boiler, etc. Set consists of covered kettle, with two inset pieces, as shown, one of them perforated, with a wire handle which fits either of the two small sections. In this way you may use the perforated section, with the kettle as a steamer, the open pan with the steamer as a double boiler, or use all of the pieces separately. The sections of this combination cooker nest together so neatly, yet the whole outfit is most versatile, so that it is almost possible to cook a whole meal with this one combination. Kettle itself has a capacity of about 10 pints and measures about 10 inches in diameter by about 6 inches high. Here is a low-priced unit that should answer most of your cooking needs, at a price that should appeal to even the strictest budget. 0153-1270. Price, four-piece set, del'd... **2.19**
