De Luxe Oil Furnaces

389⁰⁰ —Ten-Year
Cash Terms Available†

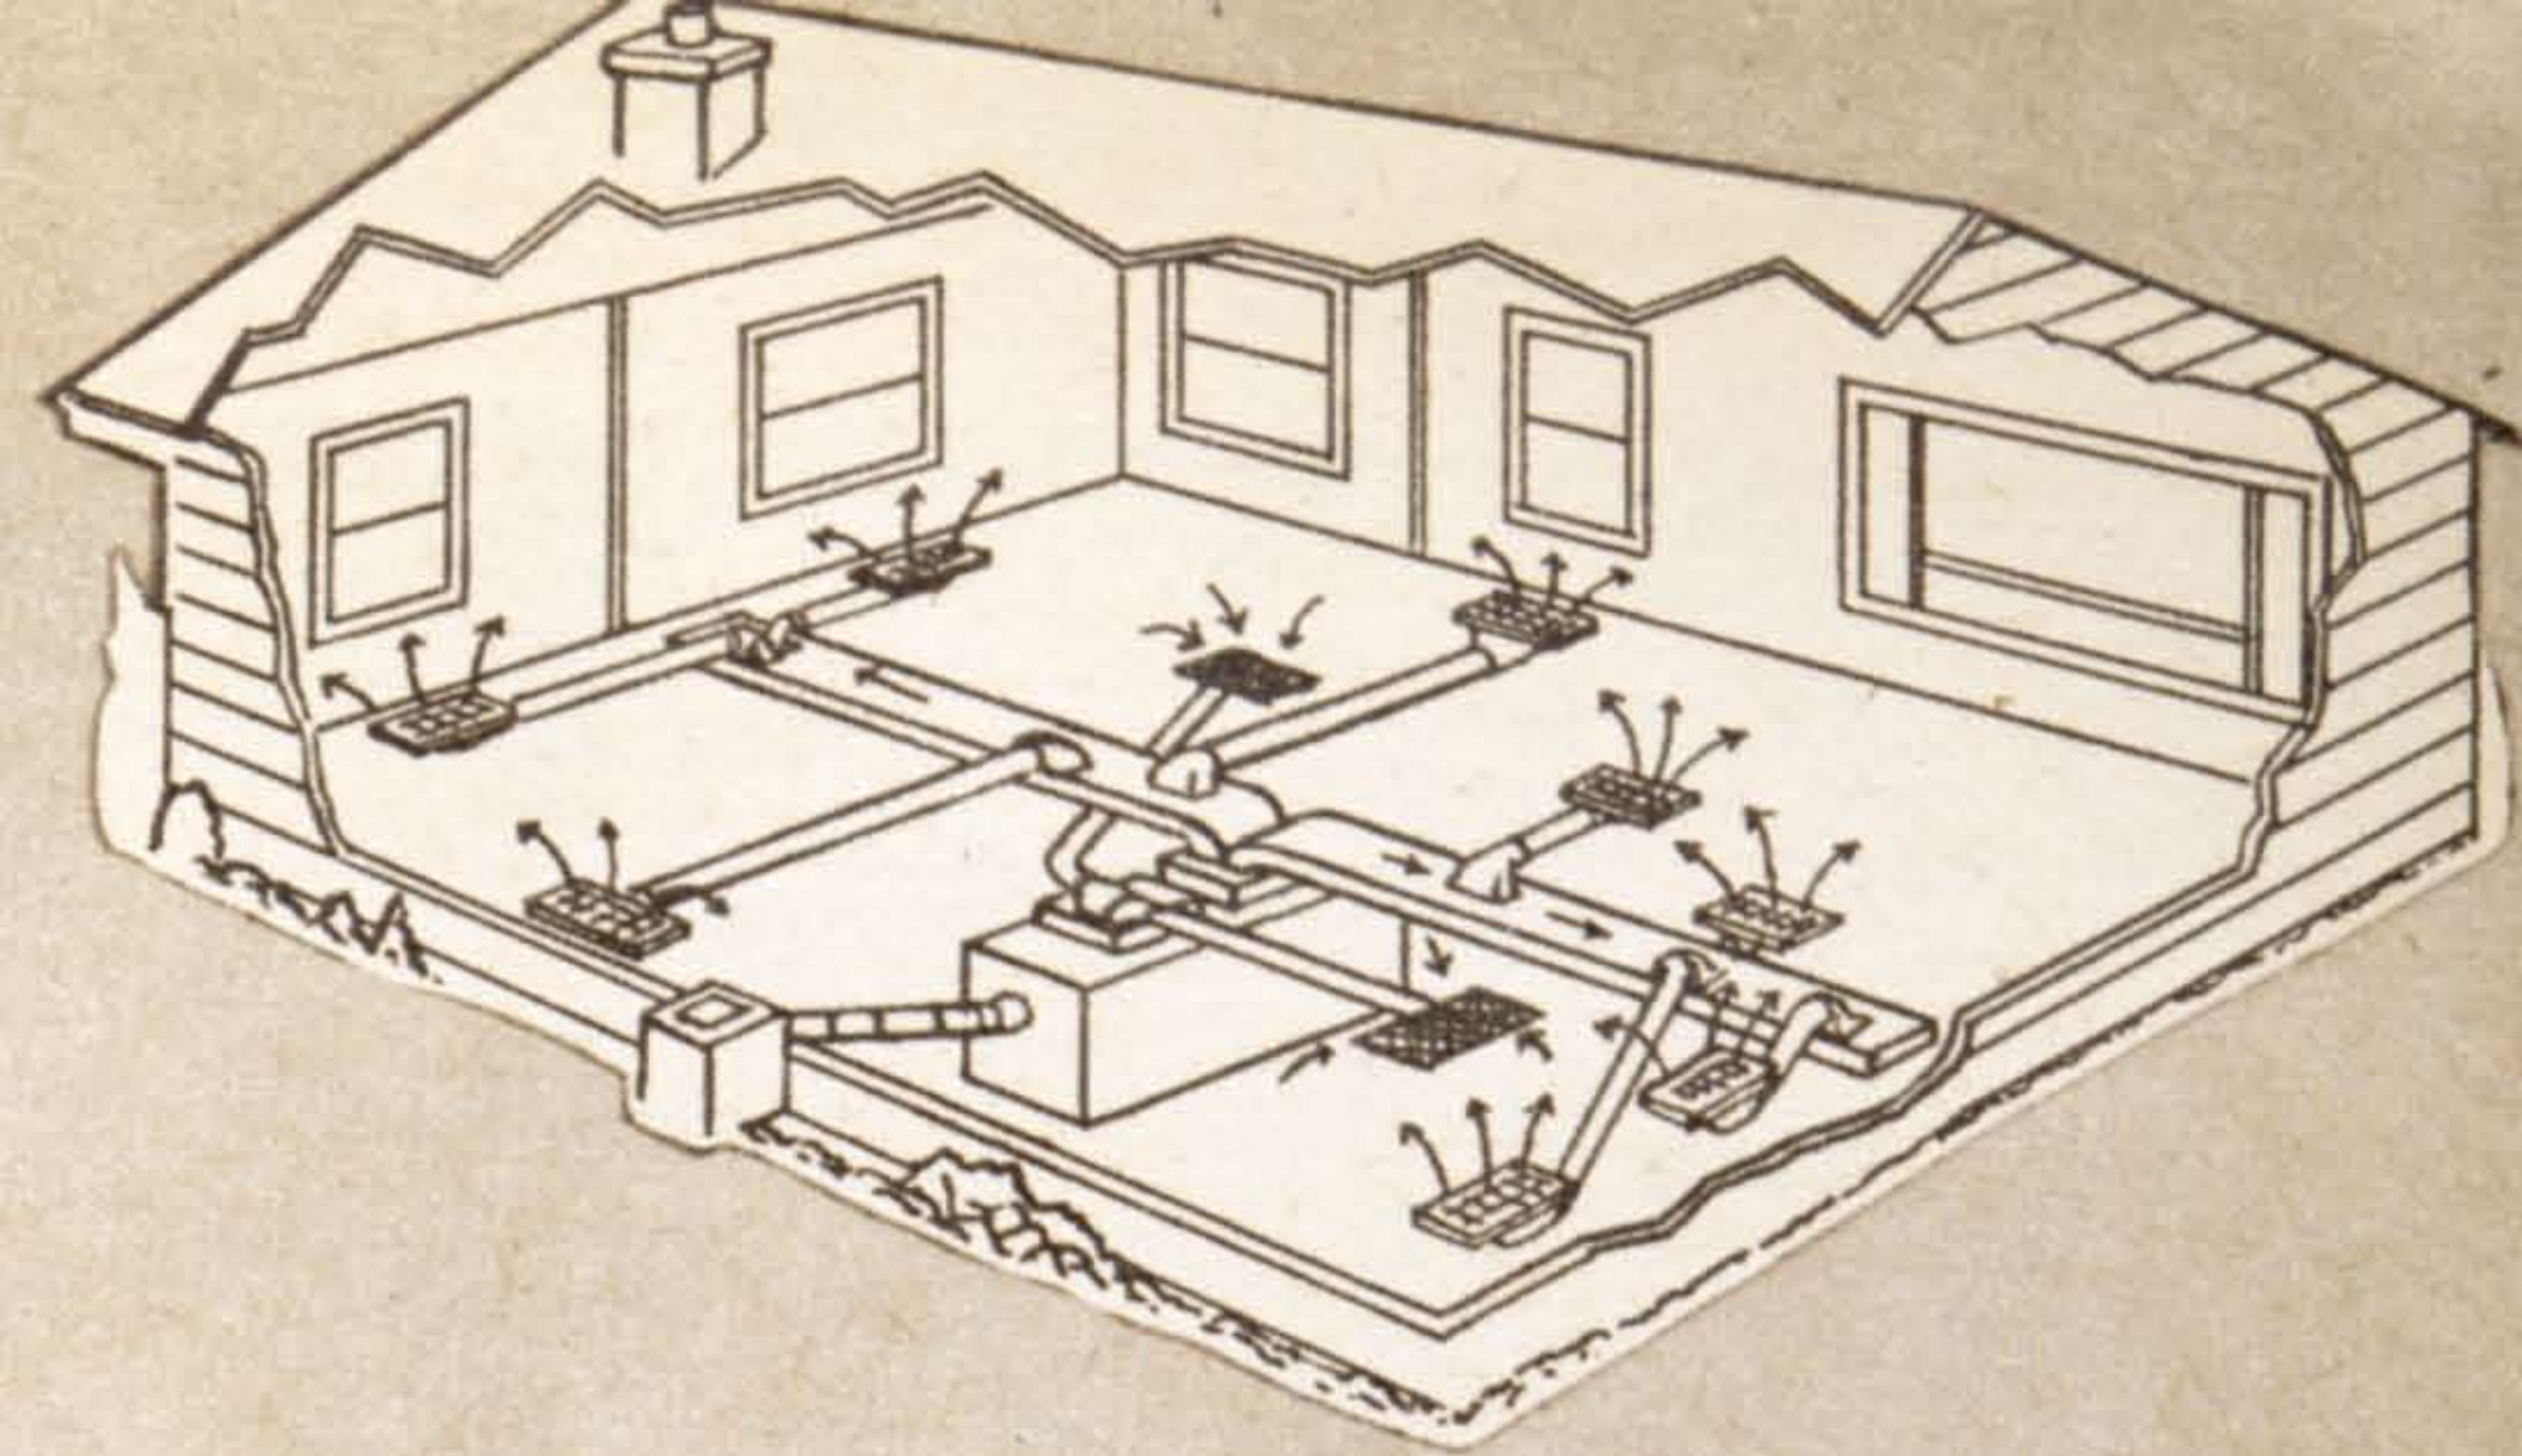

TECO FEATURES—

Your Assurance of Quality

- Simple, trouble-free design
- New, superior styling—Baked Enamel finish
- Exclusive Double Vortex Burner, gives more heat at less cost
- Ten-Year Warranty on Heat Exchanger
- Honeywell de luxe Controls, the finest available.

The high operational efficiency and consequent economy of this furnace are provided by a superior air/oil mixture. Double Vortex is the key, oil and air are pre-heated, mixed, and ignited then re-circulated for complete combustion and a resulting intensely high, clean, flame temperature. This exceedingly hot flame is then directed into the heat exchanger where it radiates evenly over the entire heating surface, thus achieving more rapid heat transfer. The simplicity of this design also makes for long trouble-free service, there are no moving parts in the combustion area, and no adjustments are necessary to the factory-set major components. 7-inch smoke-pipe collar.

Cat. No.	B.T.U. Output	Model No.	Each
F56-A 4958	78,000	DV78	389.00

TECO GAS-FIRED SYSTEMS

Gas-fired perimeter System for an average five-room, one-story house, as low as **360⁰⁰**

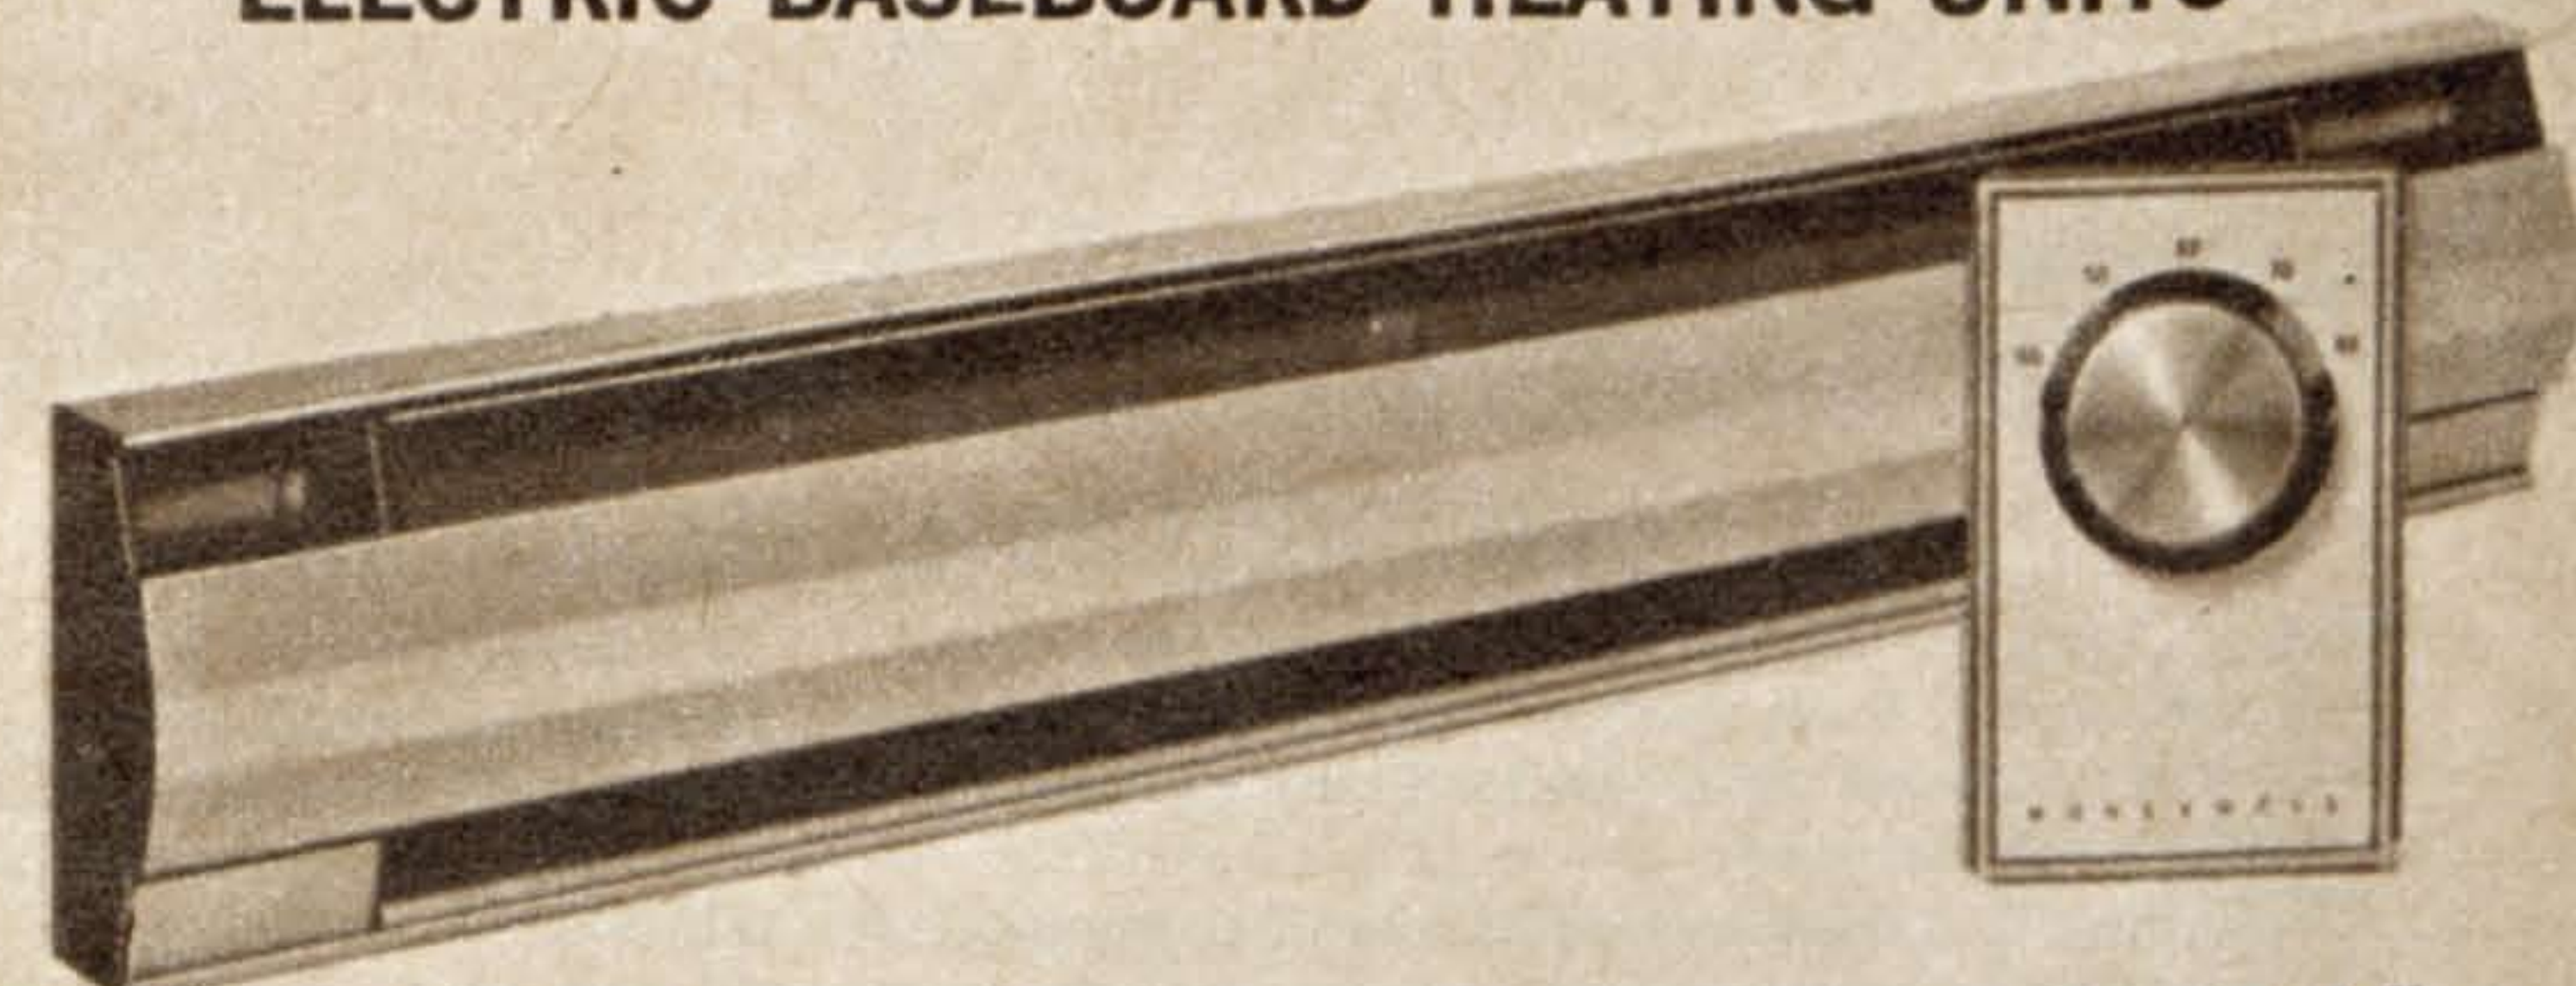

Enjoy the convenience of automatic heat with a complete system designed to your specifications. Includes TECO gas furnace with automatic controls, all necessary ductwork and registers, plus comprehensive plans and installation instructions. Gas piping not included.

ELECTRIC BASEBOARD SYSTEMS

Electric Baseboard System for an average five-room, single-story house, as low as **350⁰⁰** less wiring

EATON'S will design a heating system using clean, modern electric baseboard heaters. Each room with its own individual thermostatic temperature control. The system may be designed for complete heating or as a supplement to existing heating equipment. Our estimates are based on the home being already insulated to local electric heating specifications.

ELECTRIC BASEBOARD HEATING UNITS

Primed—ready to paint. Units are delivered completely assembled with a full length of streak-seal gasket to form a permanent and even finish should wall surface be uneven. Please note: 500-Watt heaters have built-in thermostats.
